WHO I AM

My name is Matt, I'm a Web Engineer located in Washington, DC. For over ten years, I have worked develop, design and architect a wide array of web projects.

Most of my time has been spent working for news companies and online publishers. This has allowed me to learn and to find creative and different ways to bridge the large gap between 'old' and 'new'.

WEB ENGINEER

WORK EXPERIENCE

AAMC - (Association of American Medical Colleges)
Lead Software Engineer June 2016 - current

As the Lead Software Engineer, my primary focus has been on architecting new and legacy applications. I'm also responsible for leading and mentoring a team of developers.

Key Achievments:
- Updating legacy application to new stack.
- Updating continuous development process.
- Increasing team velocity through agile planning.

THE WASHINGTON POST
Lead Developer 2011 - 2016

My primary focus was on researching and guiding the technical side of aspect of legacy and new applications. This included testing and implementing new technologies. As well mentoring and interacting with fellow developers. Ensuring that business objectives and a scalable development objective were both met.

Key Achievments:
- Migration of legacy and new applications to the cloud.
- Implemented CI and CD methods across multiple applications.
- Lead developer for javascript software as a service application.
- Front end lead for self-service advertising application.
- Developed HTML 5 internal campaign tool.

KIPLINGER'S PERSONAL FINANCE
Web Development Manager, 2010 - 2011

Provided leadership of development projects from conception to completion, managed resources and the experience of Kiplinger's web presence.

Key Achievments:
- Led development of editorial scheduling tool.
- Developed and implemented website commenting system.

DUAL TONE MEDIA
Web Developer & Designer, 2007 - 2010

Led multiple web projects for a variety of clients.
